

## **The company**

Magma Moulding is a leading plastic injection moulding business based in Plymouth. We work with a range of blue-chip and fast growing businesses and are leaders in reshoring manufacturing back to the UK

## **The Role**

The Multi Skilled Maintenance Engineer plays a critical role in the efficient operation of our factory, looking after a range of plastic injection moulding machines and ancillary equipment. You'll work closely with technical and mould shop teams.

## **Key Responsibilities**

- Maximising machine availability through planned maintenance and undertaking reactive maintenance in a timely manner when required.
- Taking full responsibility for maintenance of all plant and equipment and maintaining comprehensive records of all maintenance activities.
- Utilising maintenance history data to define and implement improvement strategies where required.
- Working with Project Teams on NPI where required.
- To actively champion health and safety, promoting a safe working environment for all.

## **About you**

- Relevant qualifications in an engineering related discipline, you will also have a minimum of 5 years' experience in a similar manufacturing environment.
- You will be experienced in both planned and reactive maintenance of injection moulding machines and related ancillary equipment, with detailed knowledge of hydraulic and pneumatic systems.
- You will be a natural problem solver with excellent fault-finding and diagnostic skills.
- You will be able to read and interpret mechanical and electrical drawings.
- You will be a team player, able to work under pressure to maximise machine availability.
- You will have a strong understanding of appropriate health and safety regulations.
- Knowledge of 3 and 6 axis robotics would be a distinct advantage.
- Knowledge of PLC's and electronics would be advantageous.

## **Package**

- Salary - £40,000
- Workplace pension
- Working hours – 8-4 Monday to Friday
